A Vision for Strengthening Mental Health Services

June 3, 2015

The Opportunity

A generous donor gift is making it possible for UCSF to unify diverse research and clinical disciplines to support a holistic approach to medical and mental health care. This new facility would offer a unique and powerful array of services, especially for children and families.

The Gift

The \$50 million gift includes a parcel of land at 2130 Third Street, plus construction funds.

“ UCSF is poised to help transform science, clinical care and training in psychiatry in the next decade . . . ”

Dr. Matthew State, MD, PhD

The Proposed Building

- Approximately 140,000 gross square feet (gsf)
 - 5 floors above ground; 1-2 floors below ground (with approximately 30 parking spaces)
 - Replacing existing 30,000 gsf, 3-floor building and parking lot
- Conforms to Central Waterfront Plan's "Life Science and Medical Special Use District" zoning overlay in Dogpatch
- Expected to conform to height/bulk for the area

Estimated Timeline

- RFQ/RFP process June-July 2015
- Developer Selection Nov. 2015
- Design Nov. 2015-Feb. 2016
- CEQA Process Starts Oct. 2015
- Regents consideration Nov. 2016
- Occupancy Spring 2019
