Patient care is informed by advances from UCSF's biomedical enterprise, home to 5 Nobel Prizes. These advances include:

- Conducted clinical trials of the first FDA-approved cancer immunotherapies (early 2000s).
- Discovered protease inhibitors, leading to first successful HIV/AIDS therapies (1990).
- Developed catheter ablation therapy for heart arrhythmia (1980s).
- Discovered the role of high blood sugar in diabetes, leading to glucose-control strategies used worldwide (1980).
- Co-discovered recombinant DNA, launching biotechnology industry (1974).
- Established Neonatal Intensive Care Nurseries, one of the first of its kind worldwide (1964).
- Performed more than 15,000 organ transplants since 1963.

UCSF Health has affiliated with top community hospitals and health systems throughout Northern California, bringing highly ranked specialty care to patients in their communities. Affiliations include Dignity Health, John Muir Health, Marin General Hospital, Washington Hospital Health System, Sonoma Valley Hospital, Santa Rosa Memorial Hospital, Valley Hospital, Golden Gate Urgent Care and Hospice by the Bay.

### About UCSF Health

UCSF Health is recognized worldwide for the excellence of its patient care, incorporating the latest medical knowledge, advanced technologies, and pioneering research, as well as an unwavering commitment to patient satisfaction and safety. UCSF Health provides care through the flagship UCSF Medical Center, UCSF Benioff Children’s Hospitals, and Langley Porter Psychiatric Institute and Clinics, as well as its affiliates throughout the San Francisco Bay Area.

### Excellence in Care

- Leader in treating the most complex medical conditions in 15 specialties.
- Top 10 hospital nationwide in cancer; diabetes and endocrinology; ear, nose and throat; geriatrics; gynecology; nephrology; neonatology, neurology and neurosurgery; ophthalmology; orthopedics; pulmonology; rheumatology; and urology.
- Ranked among the nation’s Top 10 hospitals for 17 years.
- Consistently exceeds national standards in patient satisfaction and safety.

### Public Mission

- UCSF Medical Center provides more hospital care for Medicaid patients than any other hospital in San Francisco. In FY2017–18, UCSF Medical Center provided:
  - $273.5 million in subsidized care to Medi-Cal patients and charity care to uninsured patients (does not include additional care provided by Benioff Children’s Hospital Oakland)
- UCSF Health faculty provide all physician care at our two public partner hospitals:
  - Zuckerberg San Francisco General Hospital and Trauma Center: 145+ years
  - San Francisco VA Health Care System: 50+ years
