

On February 1, 2015, one of the nation's premier medical centers opened the doors of a new world-class facility. UCSF Medical Center has opened three state-of-the-art hospitals at UCSF's Mission Bay campus, where top clinicians have joined expert researchers to develop next-generation therapies and cures.

### *Beds*

UCSF Benioff Children's Hospital San Francisco contains 183 beds, including a 50-bed Neonatal Intensive Care Nursery.

### *Inpatients*

All pediatric specialties, with expertise in virtually all pediatric conditions including cancer, heart disease, neurological disorders, organ transplant, orthopedics and the care of critically ill newborns.

### *Hospital Hallmarks*

Consistently ranked one of the top children's hospitals in California, UCSF Benioff Children's Hospital San Francisco will stand as an iconic landmark of health care, built from the ground up with care and compassion in mind. Through revolutionary medical research and specialized patient care designed just for kids, UCSF is bringing the future of children's health to Mission Bay.

## Exceptional Features:

- Kids-only pediatric emergency department.
- MRI scan suites offer children the chance to virtually experience a San Francisco trolley ride, or to play with a cast of animated critters as they go boating around the San Francisco Bay.
- Nearby Family House and onsite Ronald McDonald House for families to sleep under the same roof as their child.
- Hospital rooms boast a cozy alcove with bed and extra space for a parent to stay in the patient's room.
- Classroom fully accredited by the San Francisco Unified School District for patients and siblings in grades K-12.
- Rooftop helipad to promptly transport critically ill babies, children and pregnant women from outlying hospitals.
- Family room with showers, laundry, snack facilities and staff to assist parents with questions about their child's diagnosis and special services.
- Interactive mobile science exhibits designed by San Francisco's Exploratorium that can be wheeled into a patient's room for private playtime.
- Multisensory room with a shimmering waterfall, dancing stars and swirling bubbles to soothe or stimulate a sick child.
- An eye-catching fleet of tireless robots that work around-the-clock to remove and deliver food and linens, medications and lab specimens.
- A media platform available to all inpatients enabling them to order room service, Skype with friends and classmates, update social media accounts and pick from an expansive selection of movies.
- Clean to the extreme. Smooth surfaces, minimal ledges and equipment mounted on the ceiling where it cannot be touched facilitate hygiene maintenance, a significant benefit for immunocompromised pediatric patients susceptible to infection.
