WEDNESDAY - FRIDAY
SEPTEMBER 6-8, 2006

5th International Conference on
Frontotemporal Dementia
The 5th International Conference on Frontotemporal Dementia will be a three day conference with one full day devoted to caregivers, family members and interested laypersons, as well as three days of scientific sessions. Topics which will be covered include the molecular basis of FTD, animal models, behavioral manifestations, diagnostic testing, and biomarker assessments including neuroimaging, and genetics.

Upon completion of this course, participants should be able to:

- Discuss the latest advances in the clinical presentation of Frontotemporal Dementia and related disorders;
- Review the neuroimaging and other biomarker data in Frontotemporal Dementia and related disorders and their role in diagnosis;
- Discuss the latest advances in the molecular biological and animal model research in Frontotemporal Dementia and related disorders, with an emphasis on how these advances will lead to treatment;
- Discuss the clinical, pathological and molecular overlap between Frontotemporal Dementia and degenerative syndromes presenting with motor symptoms, including Amyotrophic Lateral Sclerosis, Progressive Supranuclear Palsy, and Corticobasal Degeneration;
- Review current treatment options for Frontotemporal Dementia and related disorders;
- Review specific medical, legal and sociological issues relevant to providing care for and living with patients with Frontotemporal Dementia and related disorders.
