UCSF In The News

If You Get Colon Cancer, Your Prognosis Depends Partly On Where It Started

The Washington Post | Alan Venook, MD, found that people with cancer on the left side of their colons live significantly longer than those with tumors on the right side, and this may provide insights into better drug therapy.

Pioneering Elbow Transplant at UCSF

San Francisco Chronicle | UCSF surgeons performed the first successful elbow transplant, from one arm to the other arm of a patient who suffered grievous injuries in a motor vehicle crash.
